

Para Table Tennis Classification Calendar for 2020

As of 2019, ITTF will make some changes in the classification strategy in order to achieve several goals:

- To ensure that classification is performed in the best possible environment so that the classifiers can take their decisions without pressure, rush or any other negative circumstances.
- To help spreading classification awareness among national associations
- To ensure the correct development of classification in all continents
- To continue the training of new classifiers as well as the updating of current classifiers

The main changes will be:

- All tournaments will have a limit of entries for new players. When that limit is reached, no new players will be allowed to enter.
- Reevaluation of already classified players will only take place in selected competitions and there will be also a limit of players who will be admitted for reevaluation in each tournament.
- No player will be admitted to reevaluation unless he or she fulfill these 2 criteria:
 - o The classification status must be R or FRD2020. Classification status of players is published here <http://stats.ipittc.org/profiles>
 - o The required medical information is sent one month before the competition starts through <https://paratabletennis.typeform.com/to/g4HyKP>
- Classification of players with intellectual impairment will only take place in selected competitions and a limit of players per tournament will be set.

In the following pages, you will see several tables containing the information about the classification seminars, the tournaments with reevaluation or classification for intellectual impaired athletes and the limits of entries.

Any enquiries about these matters must be sent by the authorized National Association representative to classification@ittf.com

Sheng K. Wu

ITTF Classification Officer

Pablo Pérez

ITTF Para Events and Classification Manager
